

Ideal for all areas!

LS38 L-ion/LS38 Electric

Multifunction Vacuum Sweeper "twin force" for hard floors and carpets

STRENGTHS

- › Ideal for mixed applications: hard floors/carpeted floors
- › Patented mechanical sweeping system "Twin Force" and powerful suction
- › 6-stage filtration system
- › Only 100gr. Handle weight, quiet and easy-to-use
- › Ergonomic handle and aluminum telescopic wand
- › Only 14cm (5.5in) base-height for easy access under furniture
- › Adjustable front gate to collect debris up to 10mm (0.39in) size
- › Direct Mount Suction Motor for no loss of power
- › Dry Cleaning System (DCS) available (optional)
- › Battery Version equipped with 36V-6Ah Lithium Ion battery for long runtime
- › Electric Version with 10mt (32.8ft) cable for continuous work
- › Energy Class "A" ("A ++" from September 2017)

MINI VACUUM SWEEPER

A machine unique in the world, entirely covered by an international patent. LS38 combines the mechanical strength of two high speed counter-rotating rollers "twin force", which rotate at 2000 RPM, to a perfect suction over the entire sweeping width. The swivel joint allows a real practical steering effect. The machine is perfectly at ease on rough or polished floors even with wide and deep grooves. It is the ideal tool for low-pile carpets and rugs.

ADJUSTABLE GATE

To obtain the maximum suction together with the maximum capacity to collect large size debris, we have patented an adjustable front gate to adapt the machine to any requirement. The collection filter bag has an opening as wide as the brushes themselves thereby providing less possibility of obstruction.

DRY CLEANING SYSTEM/ENCAPSULATION

In seconds and with no tools, the DCS (Dry Cleaning System) converter (optional) can be installed to convert the LS38 to a very effective Low Moisture Carpet Cleaner thanks to the mechanical action of the two high speed counter-rotating brush rollers.

MAINTENANCE WITH-NO-TOOLS

Maintenance could not be easier. No tools are required to replace the brush-rollers, to clean the brush area or to replace the filters. The brush-rollers are dynamically balanced and rotate at 2000 and 2200 RPM respectively for versions L-ion and Electric. The brush supports are metal with sealed ball bearings.

TECHNICAL SPECIFICATIONS	LS38 L-ion	LS38 Electric
Input power suction / brush motor (Watt)	270	400
Front brush speed (rpm)	2000	2200
Rear brush speed (rpm)	2000	2200
Filter bag (3 layer microfibre) capacity (lt)	4.5	4.5
3M Filtrete exhaust microfilter	Standard	Standard
Soft start and overload electronic control	Standard	Standard
Working width, vacuum (in)	15	15
Working width, brush (in)	13.8	13.8
Run-time on floors (min)	50	non stop
Run time on carpet (min)	40	non stop
Battery recharging time (min)	90	-
Battery check with charge level indicator	standard	-
Noise level db(A)	68.8	71.5
Weight on handle (lb)	0.22	0.22
Total net weight (lb)	17 (with batt.)	14
Dimensions LxWxH (in)	15x17x5.5
