

i-drive

Breaking down
barriers of large
spaces

faster

cleaner

greener

safer

better

The best of both worlds

i-drive: large space specialist
imop lite: small space specialist

Benefits

Cleans large spaces faster
i-drive cleans large spaces fast so more time to focus on smaller, detailed work
Less water consumption compared to standard mop
Clear front view while driving
Operator has time to rest while cleaning
base-mounted lights for cleaning dark spaces

i-drive

i-drive is so much more than a battery powered ride-on floor cleaner used for cleaning large areas. The key feature of the i-drive is its implicit design to carry an i-mop lite on its back to allow the operator to exit the vehicle and clean more detailed areas. With two sets of batteries, this smooth drive is ready to serve you 24/7.

The i-drive is your personal filling station. When the clean water tank of the imop Lite is empty, just add fresh water directly from its large freshwater tank. When the recovery tank of the imop Lite is full, you can empty it into the i-drive. Also the i-drive carries an extra battery for the imop Lite. With a turning radius of just 1.6 m, the device is very flexible and offers excellent manoeuvrability.

Faster

The i-drive carries on board all what is needed to do an effective and efficient cleaning job. Clean large, medium and small areas without traveling time. Because of it's small turning radius, it can turn in narrow aisles.

Cleaner

The i-drive is its implicit design to carry an imop lite on its back to allow the operator to exit the vehicle and clean more detailed areas.

Greener

Due to the high mechanical power of the i-drive, we use less water and little to no chemicals for cleaning

Safer

This machine is equipped with a ramp and adjustable foot rest for better ergonomics. Also, the front & rear safety lights and the base-mounted lights illuminate the floor, allowing you to clean even dark spaces. Smart design ensures clear front view while driving.

...and better for everyone

This machine is the answer for supermarkets, stadiums or any building with mixed spaces. The concept of the i-drive carries on board all what is needed to do an effective and efficient cleaning job.

Batteries sliding tray

The battery rack has space for six i-power 14 batteries which gives you a run-time of 80 minutes. To change the batteries simply pull out the rack and slide out the batteries. By changing and charging batteries, 24/7 driving is possible.

Easy operation

No PhD required to operate the i-drive, we have done all the programming for you. The self-explanatory icons and clear control panel lets you make this machine very simple to use.

Filling stations

Fill, refill and empty the imop Lite easily. No longer bound to installed filling stations, get fresh water from the i-drive, or empty the recovery tank into the i-drive by hose in a pinch.

In reverse

The squeegee and brushes retract during backup and driving automatically.

Adjustable pedals

The pedals are easily positioned to meet the driver's exact requirements.

Ramp

The ramp can be rapidly assembled for the safe and ergonomic loading and unloading of the i-mop Lite.

Technical specifications

Working width	610 mm
Driving speed	5.5 km/h
Solution tank volume	62 liter
Recovery tank volume	55 liter
Detergent tank volume	5.5 liter
Power	i-power 14 batteries
Running time up to	80 min
Dimensions (l x w)	1.460 mm x 600 mm
Turning circle diameter	1.660 mm
