

Quality >> made by Haaga

Haaga Kehrsysteme GmbH, which is situated in Kirchheim unter Teck, about 20 km southeast from Stuttgart, is a global company that has been one of the pioneers in its field for well over 45 years. Haaga's main expertise is the development of modern and high-power sweeping machines. Our products are developed and manufactured with firm conviction exclusively in Germany in order to ensure their top quality. We place a high value on environmentally-friendly and CO₂-neutral production. In order to keep the customer's travel distance as short as possible, we work with a select network of dealers. To assist you with operation and for any repairs, we are also here for you at our factory any time you may need us.

Haaga >> only good things are copied:

Even our Chinese competitors appreciate Haaga's high quality. For this they have been awarded with the Plagiarius prize. It's given to the „BEST“ copy maker of high quality products.

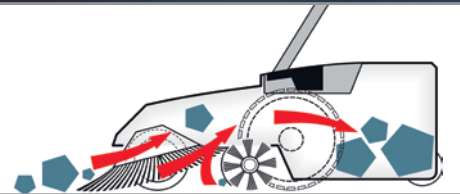

NEW

All haaga sweepers are available in a new, attractive colour design!

Twice the sweeping capacity with Haaga's Turbo sweeping system.

In addition to the disc brush system, all sweepers have the additional fine dirt roller brush that is mounted behind it. This allows these machines to effectively sweep twice with one pass. Even the most fine debris is collected.

Complete starmix program
Innovative top products under one-roof

Vacuum cleaners, hand dryers, hair dryers and sweepers with the latest technology are the basis of our production. For us it is very important to present innovative products for efficient, dust-free work and to fulfill the latest hygiene standards.

Sweepers
with the unique disc brush system

Haaga. The original

Proven system with improved technology

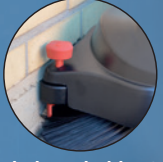

Haaga sweepers are characterized by a very easy handling and high quality. With the unique disc brush system dirt is not simply pushed in front of the sweeper but directly into the dirt container. The turbo sweeping system with an additional brush picks up dirt twice.

Vertical storage
space-saving and clean

Push handle
ergonomic or with
handle bowls.*

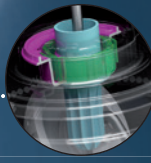

Brush down holder &
side roller

For easy sweeping along
curbs and walls.*

Sealing lip &
filter
keep the dust in
the machine.*

Worm gears and
tooth sleeves

Put of a new self-lubricating sliding glass fibre
reinforced plastic. For a longer lifetime.*

Driving clutch

Developed to ensure high reliability.*

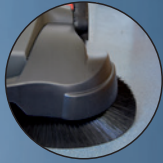

Form-fitting construction

External influences, such as dust, dirt or
wetness will not affect the function.*

Brush height adjustment

For disc brushes. Variable
and stepless. Ensures optimal
cleaning performance on various
types of surfaces.

Overlaying disc brushes

For a better sweeping performance.

* depends on the device

Top quality in a new dimension.

... now available – the new one! For previously unknown applications.

haaga
355

GREAT FEATURES

Telescopic push handle

With three different height adjustments for comfortable sweeping.

Fine dirt brush

Machines sweep twice in one step. Even the finest debris is collected.

Form of the container

Slated container for an easy crossing of steps.
