

Test Report for a General-Purpose Disinfectant Product

BS EN 1650:2019

Company:	Capella Solutions Group 1 Mantle Close, Off Bingham Road, Sittingbourne, Kent, ME10 3BW
Contact name:	Jim Bruce
Contact email:	
Purchase order number:	12856-C
Date of report:	03/05/2020
Melbec reference number:	16500
No. of samples:	1
Name of Test Product:	PROXL SANITIZE AIR/SURFACE
Batch number:	#1

Test Report for a General-Purpose Disinfectant Product

BS EN 1650:2019

Sample Details:

Manufacturer / Supplier:	Capella Solutions Group
Product storage conditions:	Ambient
Appearance of the product (as supplied):	Clear Liquid
Appearance of the product (after dilution):	Clear Liquid
Appearance of the product with interfering substance and test organism:	Slightly Grey
Active substance and concentration:	DDAC
Product dilutions/concentrations:	RTU
Diluent used to dilute product:	NA

The test product was in a satisfactory condition for testing when received.

Date product received: 23/04/2020

Date product tested: 28/04/2020

Experimental Conditions:

Interfering substance:	Bovine Albumin (dirty 3.0g/l)
Test temperature:	20°C
Contact time:	5 min
Test organisms:	<i>Candida albicans</i> ATCC 10231, <i>Aspergillus brasiliensis</i> ATCC 16404
Incubation temperature:	30°C ± 1°C

Deviations from the standard:

Obligatory / specific purposes: Client only requested testing on the product as a single concentration.

Requirements of the Standard:

The test product shall demonstrate at least a 4 decimal logarithm (lg) reduction when tested in accordance with this standard under simulated clean or dirty conditions.

Test Report for a General-Purpose Disinfectant Product

BS EN 1650:2019

Conclusion:

The product PROXL SANITIZE AIR/SURFACE (Batch Code: #1) did not meet the log reduction requirements as specified in EN 1650 (4 lg within the relevant contact time) for the *Aspergillus brasiliensis* and hence a fungicidal claim cannot be made.

The product PROXL SANITIZE AIR/SURFACE (Batch Code: #1) met the log reduction requirements as specified in EN 1650 (4 lg within the relevant contact time) for the *Candida albicans* and hence a yeasticidal claim can be made.

Testing carried out by:

Danika Weatherburn
Lab Manager

Report authorised by:

Dawn Mellors
Technical Director

Test Results:

Membrane Filtration:

Rinsing Liquid: N7
