

Sprint by Genius®

.....*Sprint* UV2

The Sprint UV2 is a high-performance commercial upright vacuum designed to meet the demanding needs of professional cleaning environments. Built for durability, efficiency and operator comfort, this powerful machine delivers exceptional cleaning performance across large carpeted areas and mixed floor surfaces.

Features & Benefits

Professional power, intelligent design

At the heart of the Sprint UV2 is an advanced dual-motor system. One motor powers the brush roller while the second provides powerful suction. This design maximises cleaning effectiveness by agitating carpet fibres while simultaneously lifting dirt, dust and debris deep from within the pile.

The result is a deeper, more thorough clean with consistent performance even in demanding commercial settings.

Designed for comfort and control

The Sprint UV2 is engineered with operator comfort in mind. A patented weight-distribution system keeps the handle weight exceptionally light and making the vacuum easy to manoeuvre during extended cleaning sessions.

Advanced filtration for cleaner air

Featuring a multi-stage filtration system designed to capture fine dust and airborne particles. A high-efficiency micro-filter works alongside multiple filtration layers to ensure cleaner exhaust air and improved indoor air quality.

An ideal choice for offices, hotels, schools, healthcare facilities and other high-traffic environments.

UV2 Specifications

Weight	7.86kg
Working width – vacuum	380mm
Working width – brush	350mm
Working capacity (approx)	630m ² /h
Bag capacity	4.5L
Brush rotation speed	5000rpm
Voltage	230–240V
Input power	880W
Suction motor	700W
Brush motor	180W
Power cord length	12.5m
3m Filtrete exhaust micro-filter	Standard
Noise level	71db
Electronic overload control	Standard
On board tools	Standard
Dimensions	380 X 325 X 1180mm

*Dimensions L | W | H

Included equipment:

- Crevice tool
- Upholstery tool
- Stretch hose
- Telescopic wand
