

Sprint by Genius®

.....*Sprint* UV6

The Genius Sprint UV6 sweeper vacuum features the advanced twin force system, combining the mechanical power of two high-speed, counter-rotating rollers operating at up to 2000rpm. Delivering powerful cleaning performance in a lightweight, cordless design. Built with advanced lithium-ion battery technology, it offers extended run time, rapid charging, and consistent suction.

Features & Benefits

Precision cleaning made easy

The Sprint UV6 combines sweeping and vacuuming in one streamlined machine,

allowing you to pick up fine dust, debris, and larger particles in a single pass. Its low-profile design and excellent manoeuvrability make it perfect for cleaning under furniture, along edges, and across open floor spaces.

Ideal for any floor

The Sprint UV6 glides effortlessly on four anti-scratch rubber wheels, with pivoting central wheels that deliver exceptional manoeuvrability. Its precision swivel joint ensures accurate steering, making it easy to navigate around furniture and tight spaces. The machine handles both rough and polished floors, even those with wide or deep joints, with ease.

Ultra-quiet operation

This sweeper vacuum is built to handle daily use while maintaining reliable performance. The quiet operation ensures minimal disruption, making it especially suitable for offices, hospitality settings, and noise-sensitive areas.

UV6 Specifications

Weight with battery	7.6kg
Working width - vacuum	380mm
Working width - brush	350mm
Working capacity (approx)	1000m ² /h
Bag capacity	4L
Brush rotation speed	2000rpm
Battery	36V
Input power suction / brush motor	270W
Runtime (floor)	50min
Runtime (carpet)	40min
Recharging time	90min
3M Filtrete exhaust micro-filter	Standard
Noise level	68.8db
Full bag indicator	Standard
Battery check with charge level indicator	Standard
Automatic shut off / low battery	Standard
Dimensions	440 X 380 X 140mm
